## **Mission**

To be the pride of Tanzania in Eastern, Central and Southern Africa market for gases, complementing accessories and services.

## **Vision**

To be the market leader in safety and reliable supply of high quality gases and complementing accessories and services in Eastern, Central and Southern Africa

# Our Values

## **INTEGRITY.**

We strive for transparency in everything that we do, and aim to maintain the trust of our stakeholders: employees, customers, society in general, and our shareholders.

## **COLLABORATION.**

We work as team to ensure we meet our strategic plans together through "Effective Communication", "Effective Leadership" and "Personal Effectiveness".

## **RESPONSIVENESS.**

We are dynamic, constantly one step ahead of the competition. We think of the bigger picture, share ideas and information, and constantly question whether we're doing something the best way possible.

## **ACHIEVEMENT.**

We are focused and committed to achieving our goals and objectives.

## **PASSION.**

We have an inner most desire to unleash potentials of our people, for our people and the community at large.

# Since 1950. We Deliver

TOL Gases Ltd. formerly known as Tanzania Oxygen Limited was established in 1950 as a branch of the African Oxygen and Acetylene Company (AFROX) of South Africa. Ownership changed in 1968 when it became part of British Oxygen Company (BOC).

In 1998 we purchased and erected an ASU plant in Dar es Salaam. This has the capacity of producing 31 tonnes a day. In the same year we also commission CO<sub>2</sub> plants in Kyejo (Mbeya) of half a tonne per hour capacity. In 2014 we installed another CO<sub>2</sub> plant at Ikama (Mbeya) of 2 tonne per hour capacity. This now enables us to get an impressive total production output of 2.8 tonnes an hour.

We value the quality of products we produce, hence it is essential that the air and around us be kept clean. We have put in place pollution free environmental activities and policies.

**CO2**  
**64**  
**TONNES**  
per day

The CO2 is manufactured from our 2 plants in Mbeya namely Ikama and Kyejo. The Gas is then moved to Dar es salaam for repackaging, distribution and sales.

**Acetylene**  
**1560**  
**CUBIC METRES**  
per day

Acetylene is produced in both the Mwanza and Dar es Salaam Plants. All volumes produced in Mwanza cater for the Lake Region while Dar es Salaam caters for the rest.

**ASU**  
**31**  
**TONNES**  
per day

The Air Separation Unit (ASU) in Dar es Salaam produces a total of the 31 tonnes of various gases. The gases include Liquid Oxygen, Nitrogen and Argon.

# Innovation, SOLUTIONS, Service. We Deliver

# SUPPLY and Services, We Deliver

## **Gases**

**We are committed to meeting customers' needs.**

From individuals to the large manufacturing plants. Our products include both industrial and medical gases, inert gases, high purity gases and medical consumables.

## **WELDING SOLUTIONS**

**We are solutions driven.**

We provide products and services that support welding, cutting and related processes. Our product line includes; welding equipment, welding automation and \*welding spare parts. (\*Manufactured only by ESAB -Elektriska Svetsnings-Aktiebolaget, Sweden)

## **Medical Gas Systems**

**We are efficient and comprehensive.**

We are leading medical gas pipeline installation specialists, providing expert teams to handle all design, engineering and installation systems for hundreds of medical sites and health facilities across the region.

This Division also includes; Training, Maintenance and Spares.

**Natural Carbon Dioxide**

# ADDING Value TO INDUSTRY. **We Deliver**

TOL Gases Ltd. partners with customers ensuring they make the most of their resources by offering a full range of atmospheric, process, industrial and specialty gases, tailor supply systems to get them to you safely and efficiently.

The following are industries that TOL Gas currently serves:

## **Our People**

Our overall goal is to be an employer of choice, to have a performance driven organization that is customer focused. This means having the right people, in the right place thinking outside the box continuously developing change and improvement. We aim to provide attractive career opportunities for our people, developing and expanding our management and leadership opportunities.

## **Our Culture**

We strive at realizing our vision by prioritizing our goals and pursuing them relentlessly through implementation. We promote a culture that is proactive, quick to respond to customer needs and encourages responsible and accountable employees; and closely monitor success and actively manage upcoming issues.

## **Safety Statement**

We maintain our level of safety by actively seeking out risk factors and continuously improving performance in every key safety metric. TOL Gases Ltd. operates under full compliance of the Occupational Safety and Health Authority Tanzania (OSHA). Our full safety policy is available online at [www.tolgases.com](http://www.tolgases.com).

## **Environment Statement**

Protecting and minimizing our impact on the environment and our workers is a priority and cornerstone to our development. TOL Gases Ltd. complies with the National Environmental Management Council (NEMC) requirements as well as all local rules and regulations. A full outline on how we comply and achieve these goal is available on our website at [www.tolgases.com](http://www.tolgases.com)
